Profile

AWS & Azure Cloud Engineer with 3+ years of experience designing, deploying, and managing secure, scalable, and highly available cloud infrastructure. Expertise in AWS architecture, Azure cloud services, networking, containerization, monitoring, and automation**.** Experienced in implementing VPC architectures, load balancing, containerized workloads, serverless automation, and cloud security solutions. AWS Certified Solutions Architect with strong experience supporting production workloads for enterprise and banking applications while optimizing performance, reliability, and cost.

Technical Skills

- **Cloud Platforms: -** AWS, Microsoft Azure.
- **AWS Services: -**EC2, S3, VPC, IAM, Route53, Elastic Load Balancer, Auto Scaling, RDS, DynamoDB, CloudFront, Lambda, SNS, CloudWatch, ECS, AWS Backup, WAF, CloudFormation, System Manager, Event bridge, EDRS, Certificate Manager
- **Azure Services: -**Virtual Machines, Virtual Networks, Blob Storage, Application Gateway, Azure Functions, Azure Site Recovery.
- **Networking: -**VPC Endpoint, Site-to-Site VPN, Point-to-Site VPN, VPC Peering, Transit Gateway.
- **Monitoring & Logging: -**CloudWatch, CloudTrail, Site24/7.
- **Databases: -**Amazon RDS, MySQL, PostgreSQL, MS SQL, DynamoDB.
- **Security & Identity: -**S3 Bucket, EFS, EBS, Blob Storage.
- **Operating Systems: -**Linux, Windows Server.
- **Automation:** - CloudFormation, Terraform.

Experience

Wysetek Systems Technologists Pvt. Ltd. 18/03/2025
Designation: -Senior Cloud Engineer
AWS Customer: - Saraswat Infotech, IPCA, ALKEM, NISM

- Designed and deployed secure AWS VPC architecture including public/private subnets, route tables, and internet gateways.
- Implemented Site-to-Site VPN connectivity between on-premises banking infrastructure and AWS cloud.
- Configured Amazon S3 for static website hosting and centralized log storage**.**
- Implemented CloudFront CDN with custom domain integration to improve application performance and reduce latency.
- Deployed AWS WAF policies to secure web applications against malicious traffic and DDoS threats.
- Configured Route53 DNS hosted zones for domain resolution and resource mapping.
- Launched Linux and Windows EC2 instances for UAT and Production environments.
- Implemented Application Load Balancer for high availability and traffic distribution across services.
- Automated server operations using AWS Lambda and Event Bridge scheduling**,** reducing operational costs.
- Configured CloudWatch dashboards and alarms for infrastructure health monitoring.

- Implemented SNS notifications for automated alerting.
- Managed IAM users, roles, and policies to enforce secure access controls.
- Reduced disk utilization by implementing automated log archival to Amazon S3 using Python scripts and crontab**.**
- Implemented AWS Backup solution for automated backup management.

Microsoft Azure Customer: - Ligases Private Limited, Green ply

- Created and configured Azure infrastructure services including Virtual Machines, SQL Server environments, Azure Backup, Azure Site Recovery, and Microsoft Defender for Cloud to support production workloads.
- Deployed Azure Virtual Network and Virtual Machines, configured an Application Gateway, and implemented autoscaling to ensure secure, scalable, and highly available application access.
- Restored VM snapshots and created managed disks for infrastructure recovery and maintenance.
- Provisioned new Azure Virtual Machines using restored disks as per operational requirements.
- Worked with Azure Site Recovery (ASR) to set up and test backup and disaster recovery for important servers and application

Capgemini
Designation: -AWS Cloud Engineer (Dec 2022 – Mar 2025)

- Designed AWS VPC architecture with public/private subnets across multiple availability zones**.**
- Implemented Auto Scaling architecture using EC2 and RDS integration for scalable workloads.
- Deployed static website hosting on Amazon S3**.**
- Built serverless data pipeline using S3, Lambda, and DynamoDB for automated data ingestion.
- Configured CloudWatch monitoring and alerting for infrastructure metrics and performance tracking.
- Automated EC2 start/stop operations using Lambda and scheduled CloudWatch events**.**
- Integrated SNS notifications for operational alerts and system monitoring**.**
- Configured automated EBS snapshot scheduling using Amazon Event Bridge Scheduler, applied lifecycle policies for snapshot retention management, and performed snapshot restoration for volume recovery.

Education

College: - Datta Meghe Institute of Engineering, Technology, and Research.
Degree: - Bachelor of Engineering in Information Technology.
B.E CGPA: - 9.6

Certification

- **AWS Certified: -** Solutions Architect – Associate
- **AWS Certified: -** Cloud Practitioner
- **Microsoft Certified: -** Azure Fundamentals AZ900
- **Google Cloud Certified: -** Cloud Digital Leader
